Dear Authorities,
This cover letter is to express my interest in your company for the position of software developer. I am highly passionate, hardworking, self-motivated and goal-oriented individual looking forward for an innovative, challenging opportunity to use my skills for the company's progress. I am currently pursuing IT engineering at Thadomal Shahani Engineering College, Mumbai and will be graduating in the academic year 2023.

In my former role as a web developer intern, I was supposed to implement an integrated payment gateway. Therefore, I am well versed with styling and animations of websites, besides having keen interest in data structures and algorithms. I have had my hands on in mobile app development where I had to work with database management. Being challenged and engaged with projects that require me to work outside my comfort and knowledge set pleases me. I am a fast learner and adapt to change quickly. Working in as a team and even help my co-workers to bring out the best in them gives me joy.

Please find my attached resume enclosing background and credentials for your consideration. I would really appreciate the chance to further discuss about this opportunity. Thank you for considering my application.

Sincerely,
Kunal Jain

KUNAL JAIN

ENGINEERING STUDENT
